

Vacancy

Hydraulic Modeller (Flood Risk)

Opportunity

Are you a flood risk consultant with at least 3 years of experience of building and developing hydraulic models to inform flood risk assessments for planning applications?

This is a great opportunity to join a successful independent company with a solid workload and ambitious plans for growth. If you would like to join our team, help deliver and develop our business and share the rewards it could bring, please apply without delay.

Expertise

- 1D/2D modelling of watercourses using Flood Modeller Pro and TUFLOW
- Hydrological modelling using the Flood Estimation Handbook
- Proficient QGIS user
- Consulting with statutory consultees
- Working in the UK development sector
- Excellent verbal and written communication skills
- Able to work under pressure and meet deadlines

About Us

Weetwood provides a broad range of flood risk and drainage consultancy services through the full project lifecycle, from due diligence, site appraisal and site promotion through planning to construction.

Our range of services include undertaking flood risk assessments, preparing surface and foul water drainage strategies, preparing detailed drainage designs, undertaking sequential, exception and justification assessments, preparing flood warning and evacuation plans, and undertaking Environmental Impact Assessments.

Our projects are across many sectors and range from small private developments to strategic sites.

We provide a nationwide service to property developers and investors, house-builders, insurers, legal firms, planning consultants and architects, technical consultants and private clients. We operate flexibly from offices in Mold, Leeds and London but have fully embraced flexible/home working.

We are committed to continuous improvement, innovation, client service, and sustainability and hold ISO9001 and ISO 14001 certification. Our business is underpinned by core values relating to sustainability, business ethics, investment in people, and high quality service delivery. We also support a number of charities through a staff led donation scheme.

Salary

We offer a competitive package, including training and support towards ICE/CIWEM professional accreditation and an excellent working environment.
